

XM Radio is a wonderful service that I elect- to pay for. They provide an invaluable variety of quality programming, including traffic and weather for many local areas. There appears to be no valid logic to support the National Association of Broadcasters' attempts to dictate what I hear on programming that I choose to pay for. Competition and progressive innovation should be rewarded rather than derided, discouraged and feared. Please do all possible within your powers to swiftly reject the NAB's petition 04-160.

Thank you for your valuable time and attention.

Kind regards,  
Mark Marshall
